Guess I should have mentioned that we weren't going to use PFAS for Level I.

Dear Lorie,

Regarding your question as to whether the Region memo 2 is sufficient to document perfluorinated acids (PFAS) as a pollutant or contaminant for the Blades HRS package, what exactly needs to be included in the HRS package depends upon how PFAS are going to be evaluated.

Hi [Redacted]

Can we use the attached memo from Region 2 to document PFAS being a pollutant or contaminant for our Blades HRS package? I think EPA's schedule is to have PFOA and PFOS classified as hazardous substances by October of this year, but that falls a little beyond our Sept. update.

Thanks!

Lorie
